On behalf of the executive committee..... WELCOME to the 12th IEEEXtreme Programming contest!

Our slogan for IEEEXtreme 12.0 is "You're Not Alone" and with over 10,000 participants and volunteers, this has never been more true! Though today all but a few of these participants are your competitors, tomorrow they will be your friends, colleagues & IEEE collaborators. Once you are part of Xtreme - you are Xtreme for Life!

So, get ready to be challenged, to push yourself to the Xtreme, and at the same time, to get energized by the thousands of students like you that will enjoy this contest over the next 24 hours.

During the next 24 hours, challenges will be released at regular intervals. There might be times where challenges may seem overwhelming, or that you are too tired to continue coding (it wouldn't be "Xtreme" otherwise, right?), however, do not get discouraged. We are sure you can make it! Do not forget that your team will have your back - take a step back, have a snack and crack a joke with your teammates - maybe take some selfies and share them on Facebook or Twitter with #IEEEXtreme12.0 - this may sometimes make a big difference!

It is important that you enjoy this event as much as you can! Hundreds of volunteers have been working for months to prepare this PROGRAMMING PARTY for you, and now it is YOUR time to live it to the fullest extent! Be sure to get plenty of rest, stay hydrated, and don't forget to eat. Above all, HAVE AS MUCH FUN AS POSSIBLE!!!

The technical team will be online at all times to answer questions. We will do our best to answer questions throughout the day. Please note: your code cannot be reviewed under any circumstances. Our first goal is to keep the integrity and fairness of the competition.

Keep an eye on the announcements page for updates and feel free to contact us using the QA system at any time.

All challenges have endured a very rigorous development and testing cycle. We do our best to guarantee the correctness of the challenges but in the unlikely event you find a mistake, note that the challenges are the same for all contestants and fairness is the most important aspect of this competition. If you have discovered an error, you might want to consider becoming part of our Quality Assurance team for future competitions :-).

A special thank you to all the volunteers who have made this event possible. We would like to express our sincerest grateful appreciation to our sponsors and partners for believing in our ideas and supporting this great event.

That being said, now roll up your sleeves and........ leeeeet's rumble!

Your first task is fairly easy (a welcoming gift from us).

For this **welcome task**, write us some feedback. Send a message and tell us anything you would like to share. What is your expectation for this competition? What will you do if you win this contest? What do you like/dislike in Xtreme? What was your most funny/strange/embarrassing programming moment?

Write a program that outputs a text with your feedback and submit it to the system. This task will not be scored and it is not mandatory, however we look forward to hearing from you!

Good luck and have fun!

Standard input

Nothing on standard input.

Standard output

Output a text with your message to us.

Constraints and notes

- Words ≤ 200
